Report ID: RPT-20261004-MUTU67LO

Detailed report · 1 selected slippage. Line = line number in the source file (header row = line 1). Column references give column number / spreadsheet letter. Variance = actual minus planned/expected.

1. Claims / Damage — Cost impact: $12,102,152

$12,102,152 · 6,338 records

Reason: 6,338 records (12.7%) are flagged "Claims / Damage" in the "Primary_Efficiency_Issue" field of this file. Why: Damage_Incident is typically 1 on these records vs 0 on unflagged ones; Claim_Amount is typically 4,890.75 on these records vs 0 on unflagged ones; Claim_Recovery is typically 2,290.71 on these records vs 0 on unflagged ones. Every flagged record shows this in its values.
Recommended: Review the flagged records with the responsible team and confirm the root cause.
Days left to address: Not available from source file
